DATE PREPARED 21 Sectember 1949 SEFERENCES 1 FINCLCSURES (NO. & TYPE) 25X1 25X1 1. Sallroad Section TITOV VALUES - GRUGELI: During the war the two railroad bridges between ALISUMA and MIROVGI across the Vardar River were destroyed. Instead of reconstructing these bridges, the line was transferred from the eastern to the wastern bank of the river 2. A roadbed 2.20 m wild was blasted into the mountains extending along the bank of the Vardar River. The blasted rocks were utilized for the foundations of the roadbed. The rails of the previous line were used for the new line (length of redist) 10 to 12 m), but new wooden ties were laid. The connections between rails are screwed between ties and relias. They are nailed. 3. A concrete-lined single-tracked turnel, 270 m long, had to be built in the northern scation of the line. In the center, a concrete arched tridge with a span of 30 m was built over a jorge. The single-track standard-gauge line is 10 km long. I was concitrated by Higgelav civilion workers and German Fas from the inter of 16 Contai healingence to divide the summar of 1945 to July 1946. The line was put into operation in August 1946, 25X1 CONNEIDENTH.	EVALUATION	25X1 PLACE OBTAINED 25X	<u>(1</u>
